Who is this program for?

This program is designed for children with physical and speech related disabilities such as cerebral palsy, developmental delays, etc. who receive Physical, Occupational, or Speech Therapy during the summer.

What activities do the children do?

In addition to regular strengthening and stretching exercises, some activities include biking, bowling, martial arts, horseback riding, and water activities all adapted to suit your child's needs.

Does my child qualify to attend?

Children must have a prescription for Physical, Occupational, or Speech Therapy. Evaluations begin in June at HealthPoint.

Why should I choose this program for my child's summer therapy?

This program enables your child to receive the therapy they need while having fun with other children. They will participate in many activities, adapted to suit their needs, that they may not have previously been able to participate in.

2011 SCHEDULE

Program runs 8 weeks, mid June to mid August.

Sessions include individual and group activities.

Will my insurance cover this program?

Most insurance plans do cover therapy services. You may contact your insurance company to verify therapy coverage.

If you feel that your child would benefit from this program please contact HealthPoint at 330.202.3301 and speak with Michelle Root.

Thanks to the generosity of the Wooster Community Hospital Auxiliary a portion of the activities have been defrayed.
